

Azure Test Plans - Comprehensive Test Case Examples

Test Case #1: User Login - Data-Driven Testing

Test Case Information

- **ID:** TC-001
- **Title:** User Login with Various Credentials
- **Priority:** 1 (Critical)
- **Assigned To:** QA Team
- **Automated:** No
- **Type:** Functional

Parameters

Parameter Name	Description
@Email	User email address
@Password	User password
@ExpectedResult	Expected outcome

Test Steps

#	Action	Expected Result
1	Navigate to https://app.example.com/login	Login page displays
2	Enter @Email in email field	Email accepted
3	Enter @Password in password field	Password masked with bullets
4	Click "Sign In" button	@ExpectedResult
5	Verify user state	User session established

Test Iterations

Iteration 1: Valid Credentials

- **@Email:** valid.user@example.com
- **@Password:** ValidPass123!
- **@ExpectedResult:** Dashboard displays with welcome message
- **Status:** ☒ Passed

Iteration 2: Invalid Email

- **@Email:** invalid.email@
- **@Password:** AnyPassword123
- **@ExpectedResult:** Error "Please enter a valid email address"
- **Status:**  Passed

Iteration 3: Wrong Password

- **@Email:** valid.user@example.com
- **@Password:** WrongPassword
- **@ExpectedResult:** Error "Invalid email or password"
- **Status:**  Passed

Iteration 4: SQL Injection Attempt

- **@Email:** admin@example.com' OR '1'='1
- **@Password:** anything
- **@ExpectedResult:** Error "Invalid email format" or login fails securely
- **Status:**  Passed

Iteration 5: Empty Credentials

- **@Email:** (empty)
- **@Password:** (empty)
- **@ExpectedResult:** Error "Email and password required"
- **Status:**  Failed - No validation message shown

Test Case #2: Add Product to Cart

Test Case Information

- **ID:** TC-015
- **Title:** Add Product to Shopping Cart
- **Priority:** 1 (Critical)
- **Preconditions:**
 - User is logged in
 - Product catalog is accessible
 - Cart is empty

- **Automated:** Partially (API tests exist)

Test Steps

#	Action	Expected Result	Notes
1	Navigate to Products page	Product grid displays	Verify 20+ products shown
2	Click on "Premium Headphones" product	Product detail page opens	Check image loads
3	Verify product information	Price: \$199.99 Stock: Available Rating: 4.5★	Screenshot on failure
4	Select quantity: 2	Quantity selector shows "2"	Test +/- buttons
5	Click "Add to Cart" button	Success message appears "2 items added to cart"	3-second animation
6	Verify cart icon badge	Badge shows "2"	Top-right corner
7	Click cart icon	Cart sidebar opens	Smooth transition
8	Verify cart contents	Product: Premium Headphones Quantity: 2 Subtotal: \$399.98	Math verification
9	Verify inventory update	API call verifies reservation	Check network tab

Linked Work Items

- User Story #1245: Shopping cart implementation
- Bug #2103: Cart count incorrect after multiple adds

Test Results History

- **Oct 15, 2025:**  Passed (Build 2.5.1)
 - **Oct 20, 2025:**  Failed (Build 2.5.2) - Cart badge not updating
 - **Oct 22, 2025:**  Passed (Build 2.5.3) - Bug fixed
 - **Nov 15, 2025:**  Passed (Build 2.6.0)
-

Test Case #3: Payment Processing - End-to-End

Test Case Information

- **ID:** TC-087
- **Title:** Complete Purchase with Credit Card
- **Priority:** 1 (Critical)
- **Estimated Duration:** 8 minutes
- **Test Environment:** QA Environment
- **Test Data:** Test credit card 4532-1234-5678-9010

Preconditions Checklist

- ☐ User account created and verified
- ☐ Items in shopping cart (min. \$50 total)
- ☐ Test credit card authorized in QA environment
- ☐ Payment gateway in test mode
- ☐ Email service configured for QA

Detailed Test Steps

Phase 1: Checkout Initiation

#	Action	Expected Result	Actual Result	Status
1.1	Click "Proceed to Checkout"	Checkout page loads within 2s		
1.2	Verify order summary	All cart items displayed correctly		
1.3	Verify shipping address auto-filled	User's saved address pre-populated		
1.4	Select shipping method "Express"	Price updates to include \$15 shipping		

Phase 2: Payment Information

#	Action	Expected Result	Actual Result	Status
2.1	Click "Payment Method" section	Payment form expands		
2.2	Enter card number: 4532-1234-5678-9010	Number accepted, spaces auto-formatted		
2.3	Enter expiry: 12/26	Valid future date accepted		
2.4	Enter CVV: 123	3-digit code accepted		
2.5	Enter billing name	Name field accepts input		
2.6	Check "Same as shipping address"	Billing address auto-fills		

Phase 3: Order Review and Submission

#	Action	Expected Result	Actual Result	Status
3.1	Review order totals	Subtotal + Tax + Shipping = Total		
3.2	Check "Terms and Conditions"	Checkbox becomes checked		
3.3	Click "Place Order" button	Processing spinner appears		
3.4	Wait for payment processing	Max 10 seconds processing time		
3.5	Verify success page	"Order Confirmed" message displays		
3.6	Verify order number	Unique order # shown (format: ORD-XXXXXX)		

Phase 4: Post-Order Verification

#	Action	Expected Result	Actual Result	Status
4.1	Check email inbox	Order confirmation email received < 2 min		
4.2	Navigate to "My Orders"	New order appears at top of list		
4.3	Click order details	All order information matches		
4.4	Verify payment status	Status: "Payment Received"		
4.5	Check inventory system	Product quantity reduced by order amount		

Test Data

```
json
{
  "user": {
    "email": "testuser@qa.example.com",
    "password": "TestPass123!"
  },
  "cart": [
    {
      "productId": "PROD-12345",
      "name": "Premium Headphones",
      "quantity": 1,
      "price": 199.99
    }
  ],

    "cardholderName": "Test User"
  },
  "expectedTotal": 229.99
}
```

Validation Points

- ✓ Payment gateway receives correct amount
- ✓ Order stored in database with correct status
- ✓ Inventory decremented
- ✓ Email notification sent
- ✓ Receipt generated (PDF)
- ✓ Analytics event tracked

Defects Found

- Nov 10, 2025: Bug #2456 - Tax calculation wrong for CA state
- Nov 12, 2025: Bug #2478 - Email delayed by 5+ minutes

Test Suite Configuration: Regression Testing

Smoke Test Suite (Run on every deployment)

Execution Time: 15 minutes Frequency: Every deployment to any environment

Test ID	Test Name	Priority	Automated
TC-001	User Login	Critical	Yes
TC-015	Add to Cart	Critical	Yes
TC-087	Complete Purchase	Critical	No
TC-102	Search Products	High	Yes
TC-145	View Order History	Medium	Yes

Pass Criteria: 100% pass rate required

Full Regression Suite

Execution Time: 4 hours Frequency: Weekly (Friday afternoons)

- Authentication: 12 test cases
- Shopping Cart: 18 test cases
- Checkout: 25 test cases
- User Profile: 15 test cases
- Admin Panel: 20 test cases
- API Integration: 30 test cases

Pass Criteria: 95% pass rate required

Test Configuration: Cross-Browser Matrix

Browser	Version	OS	Resolution	Priority
Chrome	Latest	Windows 11	1920x1080	P0
Chrome	Latest	macOS	1440x900	P0
Firefox	Latest	Windows 11	1920x1080	P1
Safari	Latest	macOS	1440x900	P0
Safari	Latest	iOS 17	390x844	P0
Edge	Latest	Windows 11	1920x1080	P1
Chrome	Latest	Android 14	360x800	P1

Test Execution Strategy:

- P0 tests: Run on all configurations
- P1 tests: Run on top 3 configurations
- P2 tests: Run on desktop only

Metrics and Reporting

Test Execution Dashboard

Sprint 24 Test Metrics (Nov 1-15, 2025)

Total Test Cases: 120

Passed: 105 (87.5%)

Failed: 8 (6.7%)

Blocked: 3 (2.5%)

Not Run: 4 (3.3%)

Test Coverage:

User Stories with Tests: 45/50 (90%)

Code Coverage: 78%

Requirements Coverage: 85%

Defect Detection:

Bugs Found: 15

Critical: 2

High: 5

- └─ Medium: 6
- └─ Low: 2

Test Execution Efficiency:

- └─ Avg. Time per Test: 4.2 minutes
- └─ Total Testing Time: 8.4 hours
- └─ Automation Rate: 65%
- └─ Manual Testing: 35%

Quality Gates for Release

- ✓ All P0 tests passed
- ✓ $\geq 95\%$ P1 tests passed
- ✓ No open critical bugs
- ✗ 2 high-priority bugs (within acceptable limit of 3)
- ✓ Code coverage $\geq 75\%$
- ✓ Performance tests passed

Release Decision: Approved for Production ✓
